EDUCATION

Developers Institute 2023
Diploma in Web Design and Development, Level 5

AUT University 2012-2014
Bachelor of Communication Studies
Major - Digital Media
Minor - Advertising

TECHNICAL SKILLS

CSS6, CSS Grid and Shopify
- I am currently using custom CSS and CSS grid within a Shopify project to alter the default styling.
- I have created multiple e-commerce sites whilst studying at the Developers Institute.

C# and Unity
- I have learnt C# through a Udemy course.
- I have continued to improve my object-orientated language skills by applying them to the game design platform, Unity.

Other languages, framworks and libraries and software
HTML5, Bootstrap, ES6, JavaScript, React, WordPress and all of the Adobe Creative Cloud.

CAREER OBJECTIVE

I am looking for a Front-End Developer position. I would like to use my previous experience in Digital Marketing and combine it with my passion for the design and customer interaction in Front-End Development.
My interests lie in developing content that caters to an ever-changing digital environment. I enjoy delving into how businesses analyse their dynamic target audience to make specific online content. I enjoy learning and love a challenge. I have a can-do attitude and am very good at adapting to new environments.

SKILLS

Responsive Design
Whilst working as a Communications & Marketing Coordinator, I worked on their website, before it was live.
I oversaw:
Website wireframes to show the scalability between multiple devices and the overall layout.

Attention to Detail
I gained a high attention to detail while working at the Private Estate and on a Super Yacht. The expectation is high within these areas of work, so it has become accustomed within my work routine to look at all the details.

Self Development
My love of learning pushes me to challenge myself and use different skills. I am teaching myself how to customise and run a Shopify website. I am also making a turn-based game in Unity. I took an online course for C#, to have a good understanding of game design in Unity. I am training in Web Development at the Developers Institute, which is giving me a base, for continued learning within the web sector.
I am currently learning:
Shopify, C#, Unity and the Front-End and Back-End Development of Web Development at the Developers Institute.

Customer Service & Problem Solving
During my time as a Customer Service Representative for a VoIP company, I often had a variety of problems to deal with throughout the day. These problems required me to communicate clearly with the customer. This allowed me to solve problems within a timely manner and eliminate the majority of problems with a simple solution.
I problem solve with:
Communication, a clear breakdown and a strategic plan.

Management
I was the manager of a small team of house staff at a private estate. Whilst managing a dynamic team, I would emphasize the importance of having a well-structured plan, as well as communicating that plan with the team. This helped cater for the numerous daily tasks in the best way possible. When working within a large family home, tasks can change very quickly, therefore I believe that team-work, being well prepared and communicating thoroughly can lead to a more productive team.
Core managing values I bring to each task:
Communication, team-work and preparation.

Marketing
With my job as a Communications & Marketing Coordinator, I worked with all of their advertising avenues. I would study what to expect from the company's target audience and analyse their preferred online experiences. This helped us to target advertisements based on where the audience were most active.
I was managing:
MailChimp, print advertisement and online advertisement, such as SEO and PPC.

RELEVANT EXPERIENCE

2015
June - September
Customer Service Representative, Conversant, *Auckland*
VoIP phone system
My tasks included porting numbers, problem solving for customers and remote access of client computers to assist with troubleshooting.
Key Skills
Customer service, problem solving, porting numbers.

January - May
Communications & Marketing Coordinator, Kiteflyr, *Auckland*
Start-up
I was responsible for the final website design, graphic design, email marketing, advertising and the social aspects of the company. I worked with a small team to make sure that the launch of Kiteflyr went smoothly.
Key Skills
Adobe Photoshop, MailChimp, PPC & SEO, website wireframing, Facebook marketing.

2014
Young Horticulturist of the Year 2014, University project, *Auckland*
Competition
I was the Project Manager for this project at University. I directed a small team to produce a 3D modelled award video, showcasing young horticultural achievements throughout 2014.
Key Skills
3D modelling, Adobe Premiere Pro, project management.

PROJECTS

Osaka Corner, Shopify
I co-manage and design a Shopify shop that sells Japanese snacks. The main goal of this project is to better understand how Shopify can be customised with CSS and how to run an e-commerce platform. I am responsible for the shops design. I am currently overwriting the generic shopify aspects that we want to change, with custom styling to give the site a more personal feel.
Key Skills
Shopify and Shopify custom styling, CSS, e-commerce.
Website link?

Mesozoic 3023, Unity Project
I have been teaching myself C# and how to use an object-orientated language within the game design platform, Unity. I am currently creating a mobile turn-based game. I have implemented a procedurally generated hex grid using for loops. I have used if statements for character movement. I have also used events such as GetTouch for camera movement and user interaction with the character.
